Phone: +91 9718117060 — Email: twarangupta01@gmail.com — LinkedIn: [linkedin.com/in/twarangupta](https://www.linkedin.com/in/twarangupta)
GitHub: github.com/twarangupta

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Python, C++, HTML5, CSS3
Frontend: React.js, Angular, Redux, REST API Integration, Responsive UI Design
Backend: Node.js, Express.js, REST APIs, Redis, JWT Authentication
Databases: PostgreSQL, MySQL, MongoDB, Snowflake, Redis
Cloud & DevOps: AWS S3, Docker, Firebase, Supabase, IICS (Informatica)
Tools & Practices: Git, GitHub, Bitbucket, Agile/Scrum, CI/CD, Data Structures & Algorithms

Experience

ZS Associates

Software Development Engineer

Pune, Maharashtra

July 2024 – February 2026

Project: Enterprise Contract Decision Support Platform

Clients: Pfizer, Merck

- Engineered modular, reusable **React** UI components for contract review workflows, cutting feature delivery turnaround time and directly supporting **\$29M+ in client revenue** generated within 9 months across Pfizer and Merck engagements.
- Built and deployed **RESTful APIs** using Node.js and Express.js to automate contract decision workflows, reducing manual processing time by **30%** and improving overall turnaround time (TAT).
- Implemented JWT based authentication and **role based access control (RBAC)** for enterprise users, securing multi-tenant contract data and ensuring compliance across client environments.
- Received Client Appreciation Award** for optimizing contract decision APIs and implementing asynchronous processing that reduced response time from **~500ms to ~200ms**, a **60%** performance improvement.
- Developed shared database stored procedures for client specific business logic and data transformations, reducing backend processing overhead and ensuring consistency across deployments.

Project: Centralized Enterprise Data Warehouse

Client: Sanofi

- Architected end to end batch data ingestion and transformation pipelines using IICS (Informatica), enabling analytics workflows that contributed to **\$36M in client revenue** for the Sanofi TAS.
- Reduced manual data processing effort by **35%** by building automated ETL mappings and data validation checks in IICS, accelerating data availability for business stakeholders.
- Designed Snowflake based warehouse schemas and SQL transformations to produce analytics ready datasets, cutting stage to production deployment time by **25%**.
- Implemented data quality metrics and validation frameworks, improving reporting accuracy and reducing downstream data issues by **20%**.
- Led production pipeline monitoring and anomaly resolution, improving pipeline stability and reducing failure rates by **15-20%**.

Nirvana Studio

Software Development Engineer Intern

New Delhi

January 2023 – June 2023

- Delivered** 10+ UI features and components using **React.js**, accelerating product feature releases and improving end user experience across the application.
- Partnered** with senior engineers to establish clean code standards and testing practices, reducing rework during code reviews and improving team velocity.

Projects

Personal Portfolio Website

twaransportfolio.vercel.app

- Designed and developed a modern, responsive personal portfolio using React to showcase projects, skills, and experience with a clean and interactive UI.
- Implemented reusable components, smooth navigation, and optimized performance for fast load times and seamless user experience across devices.

Education

Maharaja Agrasen Institute of Technology

Bachelor of Technology in Information Technology | **CGPA: 8.8 / 10**

July 2020 – August 2024

New Delhi, India

Leadership & Extracurricular

- Team Lead, **Smart India Hackathon** — Top 10 ranking among 200+ participating teams.
- Mentored** and **guided** a software engineering **intern** on project architecture and development best practices, contributing to their successful conversion to a **full time role**.
