

TWARAN GUPTA

Backend-focused Full-Stack Software Engineer | Node.js · Express · REST APIs · SQL

+91 9718117060 · twarangupta01@gmail.com · linkedin.com/in/twarangupta · github.com/twarangupta · twarangupta.com

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Python, C++, SQL

Backend: Node.js, Express.js, REST APIs, API Integration, JSON, JWT & RBAC Authentication, Asynchronous Processing, Redis (Caching), Stored Procedures

Databases & Data: MySQL (Amazon RDS), PostgreSQL, MongoDB, Snowflake, ETL (IICS / Informatica)

Frontend: React.js, Redux, Responsive UI

Cloud & DevOps: AWS (EC2, S3, RDS), Docker, CI/CD, Git, GitHub, Bitbucket

Testing & Practices: Jest (Unit & Integration Testing), Data Structures & Algorithms, OOP, Agile/Scrum

Experience

ZS Associates

Software Development Engineer

Pune, Maharashtra

Jul 2024 to Feb 2026

Project: Enterprise Contract Decision Support Platform (Client: Pfizer, Merck)

- Built REST / JSON APIs in Node.js, Express.js, and TypeScript that automated contract-decision workflows end to end across Pfizer and Merck engagements spanning **\$29M+** in contract value, cutting manual processing time **30%**.
- Re-architected synchronous flows into asynchronous processing with Redis caching, reducing API latency **60%** (about 500ms to 200ms) under production load and earning a **Client Appreciation Award**.
- Authored SQL stored procedures on MySQL (Amazon RDS) and applied OOP design patterns to encapsulate business logic, reducing backend overhead and guaranteeing data consistency across deployments.
- Enforced data isolation with JWT authentication and role-based access control (RBAC), securing sensitive multi-tenant data across every client environment.
- Built a reusable React.js and Redux component library adopted by the team to standardize the review UI and accelerate feature delivery.

Project: Centralized Enterprise Data Warehouse (Client: Sanofi)

- Built ETL ingestion and transformation pipelines in IICS (Informatica) into a Snowflake warehouse, automating SQL validation to cut manual data-processing effort **35%**; owned monitoring and anomaly resolution to drive pipeline failure rates down **15 to 20%**.
- Engineered a one-click refresh pipeline that ingested and reconciled data across multiple source systems with automated sanity checks encoding business logic; relied on by **C-suite stakeholders** for critical decisions, contributing to approximately **\$4.3M** in project revenue.

Nirvana Studio

Software Development Engineer Intern

New Delhi

Jan 2023 to Jun 2023

- Shipped 10+ UI features and components with React.js and Redux across an application serving **10K+ users**.
- Established clean-code standards and testing with Jest, reducing rework during code reviews.

Projects

JobMaxxing AI | Full-Stack AI Career Platform (Node.js, Express, React)

Live: jobmaxxing.in

- Built a live full-stack platform with a Node.js / Express REST API backend integrating LLM / AI APIs to power an automated Resume Parser and GitHub Profile Analyzer.
- Implemented reusable service hooks for AI / API integrations and Supabase OAuth authentication, and built a modular React (Vite, Tailwind) dashboard for the end-to-end job-search workflow.

Personal Portfolio + AI Assistant (React.js)

Live: twarangupta.com

- Built a responsive React.js portfolio with an AI assistant (AI API integration) that answers questions about my skills and experience by grounding responses in my resume and project data.

Education

Maharaja Agrasen Institute of Technology

Bachelor of Technology in Information Technology | **CGPA: 8.8 / 10**

Jul 2020 to Aug 2024

New Delhi, India

Leadership & Extracurricular

- Team Lead, **Smart India Hackathon**, Top 10 ranking among 200+ participating teams.
- Mentored a software engineering intern on architecture and best practices, contributing to their conversion to a full-time role.
